ABOUT US

SPACE ART INTERIOR DESIGN was formed by a group of young ambitious talented professionals who are pioneers in the field and want to share their visions and talents with other professionals in the market.

To provide a quality product that satisfies our customer needs and expectations the first time and everytime.

Our goal is to satisfy our customer' needs whether it be through timely delivery, providing the best value for money, efficient and courteous, superior quality, reliability.

At Space Art we arm ourselves with a good understanding of the factors imperative for a successful business environment We make sure that our design concepts articulate Client's business objectives, processes, culture, brand positioning and future business plans.

Each Client's needs become the platform from which Space Art conceptualizes its initial proposal. The design team works closely with the Client over the course of the project to achieve a highly desirable end result.

MULTI STOREY PARKING

G+5TH FLOOR

1. INTRODUCTION

This is a multi-storey parking structure for the new development of the building. The structure is a multi-storey parking structure with a total of 5 floors above ground and 1 floor below ground. The structure is designed to provide parking for the building and its surrounding area. The structure is designed to be a multi-storey parking structure with a total of 5 floors above ground and 1 floor below ground. The structure is designed to provide parking for the building and its surrounding area. The structure is designed to be a multi-storey parking structure with a total of 5 floors above ground and 1 floor below ground. The structure is designed to provide parking for the building and its surrounding area.

2. PLANNING PARAMETERS

These are the main parameters that govern the design of the structure. The parameters are: 1. Total height of the structure. 2. Total area of the structure. 3. Total number of floors. 4. Total number of parking spaces. 5. Total number of ramps. 6. Total number of elevators. 7. Total number of stairs. 8. Total number of ramps. 9. Total number of elevators. 10. Total number of stairs.

3. PLANNING PARAMETERS

These are the main parameters that govern the design of the structure. The parameters are: 1. Total height of the structure. 2. Total area of the structure. 3. Total number of floors. 4. Total number of parking spaces. 5. Total number of ramps. 6. Total number of elevators. 7. Total number of stairs. 8. Total number of ramps. 9. Total number of elevators. 10. Total number of stairs.

4. PRODUCT SPECIFICATIONS

These are the main specifications that govern the design of the structure. The specifications are: 1. Total height of the structure. 2. Total area of the structure. 3. Total number of floors. 4. Total number of parking spaces. 5. Total number of ramps. 6. Total number of elevators. 7. Total number of stairs. 8. Total number of ramps. 9. Total number of elevators. 10. Total number of stairs.

5. SECTION

This is a cross-section of the structure showing the internal layout. The section shows the building structure, the parking spaces, the ramps, the elevators, and the stairs. The section shows the building structure, the parking spaces, the ramps, the elevators, and the stairs.

6. MAIN ELEVATION

This is the main elevation of the structure showing the external appearance. The elevation shows the building structure, the parking spaces, the ramps, the elevators, and the stairs. The elevation shows the building structure, the parking spaces, the ramps, the elevators, and the stairs.

FLOOR	AREA (SQ.M)	NO. OF PARKING SPACES	NO. OF RAMP	NO. OF ELEVATOR	NO. OF STAIR
GROUND FLOOR	10000.00	100	1	1	1
